PROFESSIONAL SUMMARY

Information Technology student with hands-on experience in full-stack MERN development and a passion for building efficient applications. Seeking a software development internship to apply skills in Tech Stacks, and efficient solutions to solve complex problems.

EDUCATION

Bachelor of Technology in Information Technology
Karpagam College of Engineering

Expected Apr 2027
CGPA: 8.45 / 10.0

SKILLS

Languages	C, C++, Java
Web & Frameworks	MERN, Spring Boot
Developer Tools	Git, GitHub

PROJECTS

AI-Powered Civic Complaint Redressal System

Sep 2025 - Dec 2025

Full-Stack Microservices & AI Application

[Live Demo](#)

- Architected a distributed **microservices ecosystem** integrating Spring Boot and FastAPI to automate the detection, routing, and resolution of civic issues.
- Engineered a **AI Orchestrator** combining Computer Vision (PyTorch) for issue detection, **RAG** for policy based department mapping, and **Gemini LLM** for automated complaint drafting.
- Implemented a secure **Role-Based Access Control (RBAC)** system with JWT authentication and service communication using Feign Clients and Eureka Server for service discovery.
- Developed a **gamified workforce management system** featuring a credit-based incentive model and penalty logic to avoid fake completion.
- Designed a responsive **React frontend** that leverages AI to auto-fill complaint details from uploaded images, significantly reducing submission time and improving data accuracy.

Arab Spice Food Ordering Website

Jan 2025 – Mar 2025

MERN-Stack Application

[Live Demo](#)

- Engineered a full-stack food ordering platform using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) to deliver a seamless browsing-to-checkout experience.
- Built a dynamic and responsive frontend using **React.js** with a searchable menu, shopping cart, and **wishlist functionality** for personalized user preferences.
- Integrated **Google OAuth Login** to enhance authentication speed and reduce user onboarding friction.
- Developed a secure admin dashboard enabling CRUD operations on food items, improving menu management efficiency and reducing update time by **40%**.
